

ROTOJET: the best got better!

Since a few months, the new **Rotojet** was presented on multiple exhibitions. Our new demo-tank with window and modern blue LED lightning has proven to be a real eye-catcher. Not only the cleaning, but also the iControl, the evaporator and insulation are displayed.

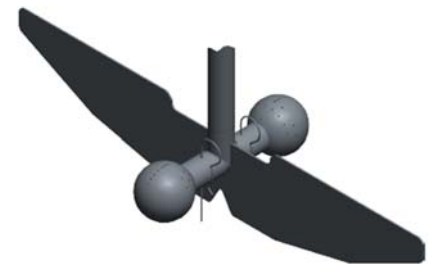

Don't hesitate to contact Dirk Vlietinck (+32.50.250.643 – dirk.vlietinck@packo.com) if you want to reserve the demo-vessel for a local show.

Standard from May 2017 onwards!!

The new Rotojet will be standard for:

- New orders from **May 2017** onwards
- Exclusive in combination with the **iControl Eco-Wash**
- Only available for **horizontal**, closed **tanks**: REM-RS-RM/IB-LEM-LS

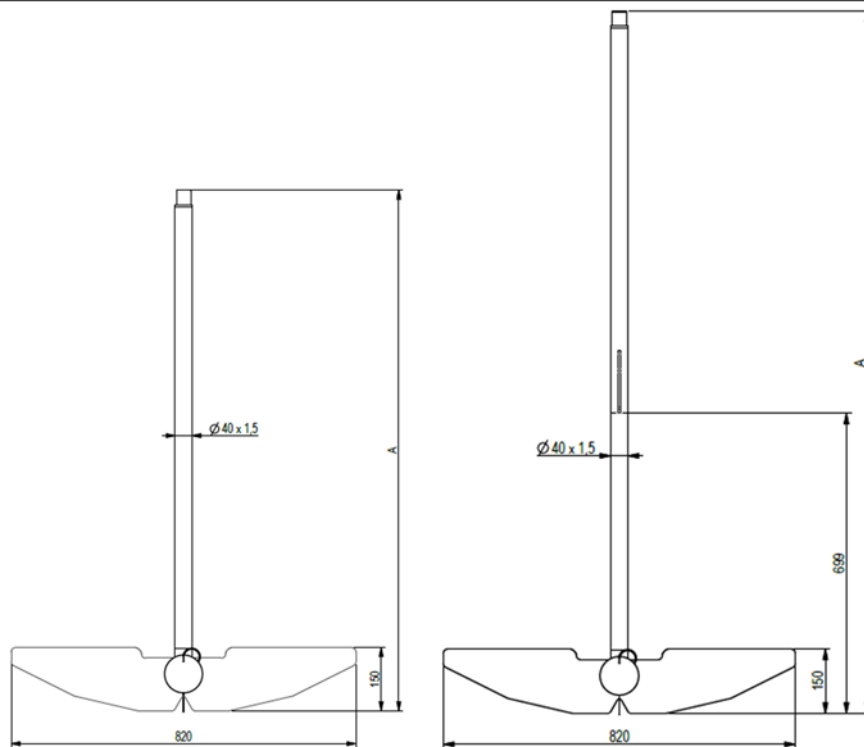

The advantages are:

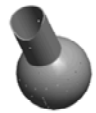

- An even **more powerful cleaning** thanks to the higher water pressure and wider cleaning pattern.
- Developed following the EHEDG and 3A principles of **hygienic design**
- A **more stable** position of the **agitator** thanks to the 'V'-opening on the bottom of the agitator blade. The opening allows the milk to pass through instead of pushing the milk upwards, back and forth, which should have a positive effect on the milk quality.
- An **optimized and robust** agitation and wash system

The specifications:

Type of tank	Part no.	Length (A)	# agitator blades
REM 1050 – 2100 RMIB 1600 - 2200	334991	932 mm	1
REM 2600 – 5000 RMIB 2800-5000	321931	1239 mm	1
REM 6150 – 8200 + RS 5000 RMIB 6000 - 7150	321932	1494 mm	2
REM 9000 – 15000 + RS 8000	321933	1639 mm	2
LEM 18000 – 31600 + LS 10250	327282	1990 mm	2
LS 13000 – LS 36000	319972	2364 mm	2

Part	Part no.	Image
Spraying ball	331755	
Connection pin	322554
